About us

Remediation Solutions, Inc. was founded by owner and operator, Don Simms, who became a state licensed plumbing contractor in 1986 in Winston-Salem NC. Being that his father was a general contractor, Don gained knowledge in construction and building from an early age, which lead him going into business for himself in the construction and trade industry and established as a highly recommended resource in the greater Winston-Salem and Greensboro areas.

His long and successful track record shined light on a persistent problem that was becoming a trend upon inspection; one that is related to moisture, air quality, and is health threatening: **Mold**

Instead of handling customers off to someone else to remedy the problem Don decided to become the one-stop solution; he became a certified mold inspector and remediator and established Remediation Solutions, Inc. in 2008.

In the past decade, with an affection for the Eastern Coast, Don, and cousin Greg Garrison, and daughter Heather Stevens, the business has garnered enough success to expand to the Coast with a *new* office and operations in Oak Island, NC (a second home to the family) to service eastern coastal counties.

Services

- **Mold** inspections and air quality testing are designed to locate all areas with mold growth present and to determine the level of mold contamination of interior air and surfaces.
- We work to develop a comprehensive and complete plan for remediation of any mold infestation found inside residential or commercial structures.
- The most effective method of mold prevention comes through moisture detection and control. Ideally, interior relative humidity should always be kept lower than 50%.
- **We can provide an initial mold inspection in about an hour at most properties. Our inspections include visual examination for mold and conditions suitable for mold infestation.**

Mold Prevention

Mold Fogging

- **Mold** fogging is a method used to treat and prevent mold growth in your home.

Safe For Family & Pets

- **Mold** fogging is environmentally friendly, non-toxic, EPA registered, and FDA approved.

Benefits Of Mold Fogging

- Kills MRSA, H1N1, mold, bacteria, viruses, spores, yeast, and fungi.
- Removes nasty odors from cigarettes, animal urine & feces, and much more.
- Dry fog vapor penetrates otherwise inaccessible areas.
- Safe in any environment – residential, commercial, or medical.
- Long term solution against allergens.
- Quick fogging process – rooms can be used within an hour or two.
- Fraction of the cost of standard abatement.

We Are Your Mold Removal Experts

- **CERTIFIED** - Our mold removal technicians are CRMI, CMR, CCMI, NAMRI certified.
- **EXPERIENCED** – We have over 35 years of experience as experts in the field of mold contamination and air quality.
- **FREE ESTIMATES** – We offer free estimates with a recommended mold remediation plan from a certified and licensed mold removal specialist.

5 Star Rated

“Don and his team know their stuff. I had two leaks that existed for years (probably since house was constructed). Causing mold growth on the basement walls. Both plumbing issues were repaired, and all mold removed, walls treated, and all basement fogged to kill spores. They also repaired another plumbing issue at my request and completed all work in 2 days, 1 day less than estimated. Very friendly and genuinely interested in making sure all desired work was completed professionally without trying to find more work just to pad the bill. I very highly recommend calling them for any mold problem you may have.”

Sloan P”

“Don and his team at Remediation Solutions are fantastic! Honestly, we got quotes from other service providers in the area and none of them took the time to inspect our home. Don spent a few hours with us, showing us the problem spots, finding the source and presented us with a full remediation plan. We had a VERY bad problem in an old home and Remediation Solutions went above and beyond to ensure that our home was safe for our family. If you have a mold problem, don't waste your time with anyone else. Call Remediation Solutions today!”
